

Year 11 & 12 Home School project

Building 18ft Gaff Cutter (2007)

Originally designed by Paul Gartside Ltd., I redesigned the deck and cockpit to accommodate a double birth cabin, using *Maxsurf Pro* design software to get a 3D image of what it would look like.

I started work on the cutter in March 2007 and have worked on it over the last 8 months.

Using a Microsoft Excel spreadsheet, I've been keeping track of costs and materials.
